## PROFILE SUMMARY

Roblox QA Tester with experience leading QA teams and testing live Roblox games. Experienced in bug tracking, regression testing, team coordination, roadmap planning, developer collaboration, and workflow automation. Led teams of testers, improved development workflows through automation and project management tools, and contributed to live game updates, promotional assets, and release readiness. Active Roblox player since 2016 with a strong understanding of gameplay systems and player experience.

## WORK EXPERIENCE

### Do Big Studios

FEB 2026 - MAY 2026

QA Tester

- Performed QA testing for Escape the Waves for Lucky Blocks, a Top 10 Roblox experience during my time on the project
- Identified, documented, and reproduced gameplay and feature-related bugs
- Verified bug fixes and conducted regression testing before releases
- Collaborated directly with developers to improve game stability and player experience
- Tested live game updates and participated in a professional QA environment

### Gym League

Apr 2025 - Feb 2026

QA Manager

- Led and coordinated a QA team of 15 testers, improving testing coverage across major updates
- Created and maintained a Planka roadmap for updates, bugs, and development priorities
- Organized testing efforts across major game updates
- Developed Discord webhook automation for reminders and task tracking
- Worked directly with project leadership, developers, and community members
- Managed bug reporting workflows and community-reported issues

## PROJECTS

### Twisted Transport

2022 - Present

Media Designer & Web Developer

- Designed and maintained websites for a large online virtual trucking community
- Created logos, banners, promotional graphics, and branding materials
- Managed digital content and community-facing communications
- Supported community growth through media production, branding, and technical development
- Worked with web technologies and automation tools to improve community operations
